

Activating automatically email sending

1. Popup the application using your secret combination key
2. Fig 1 shows your screen please make sure you are connected to the internet before going on the next step

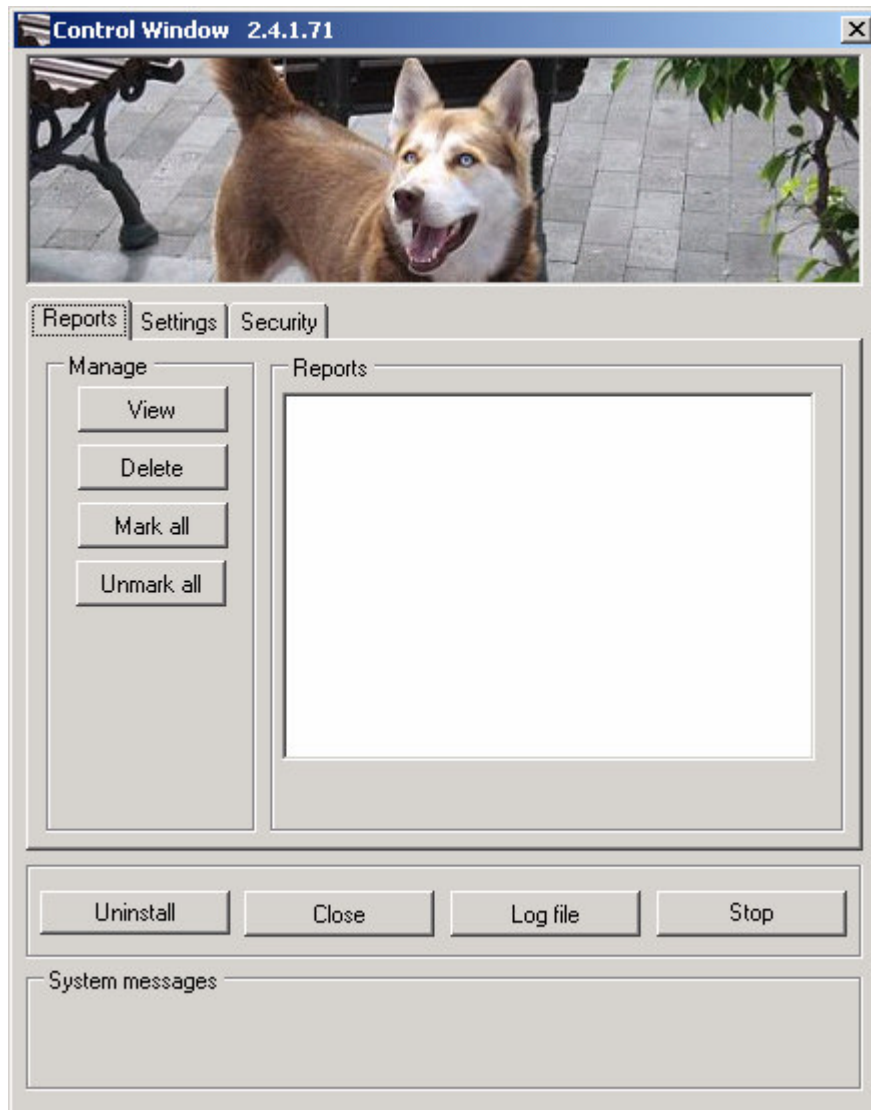

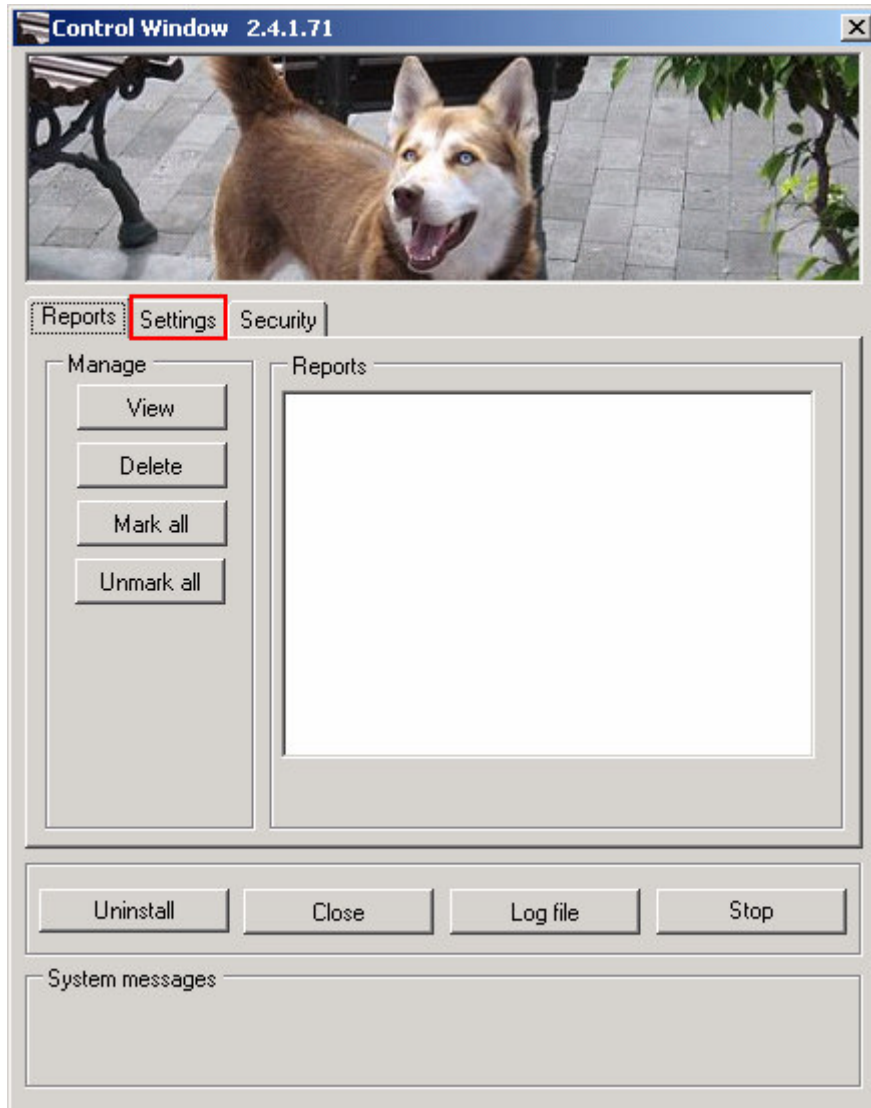

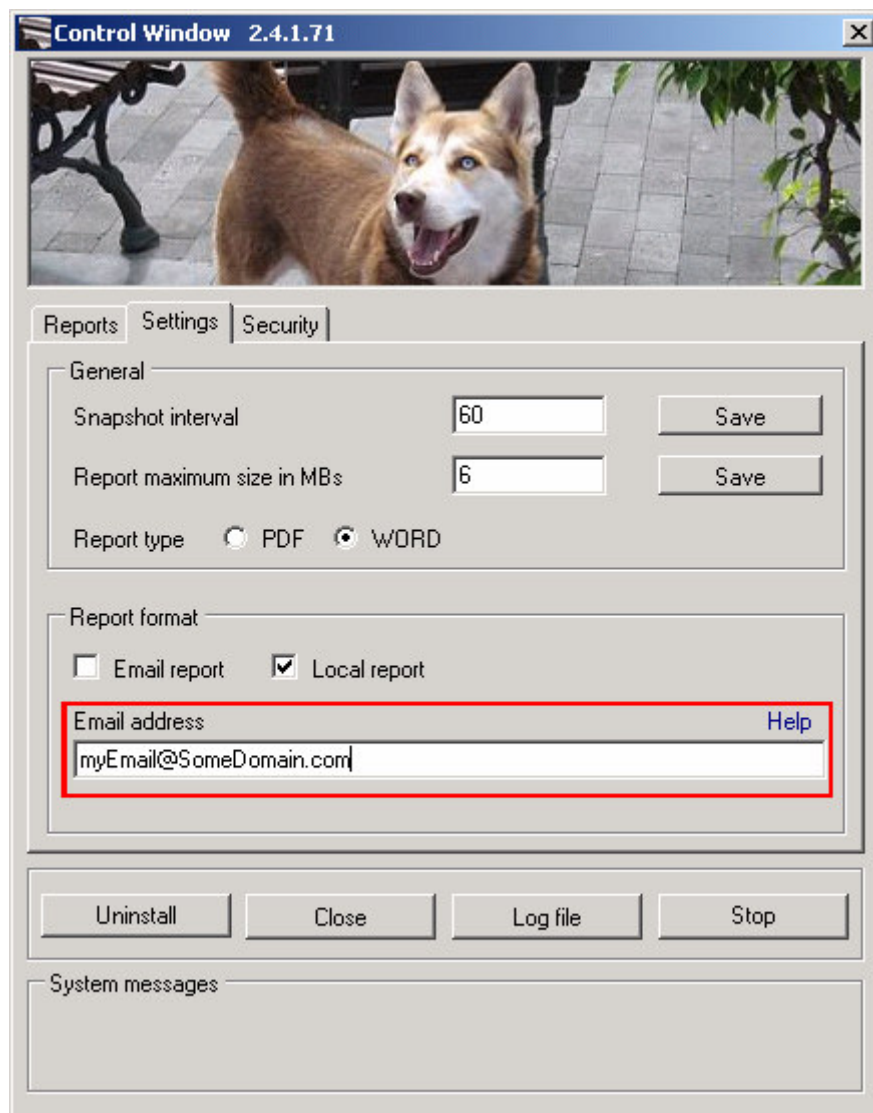

Fig 1

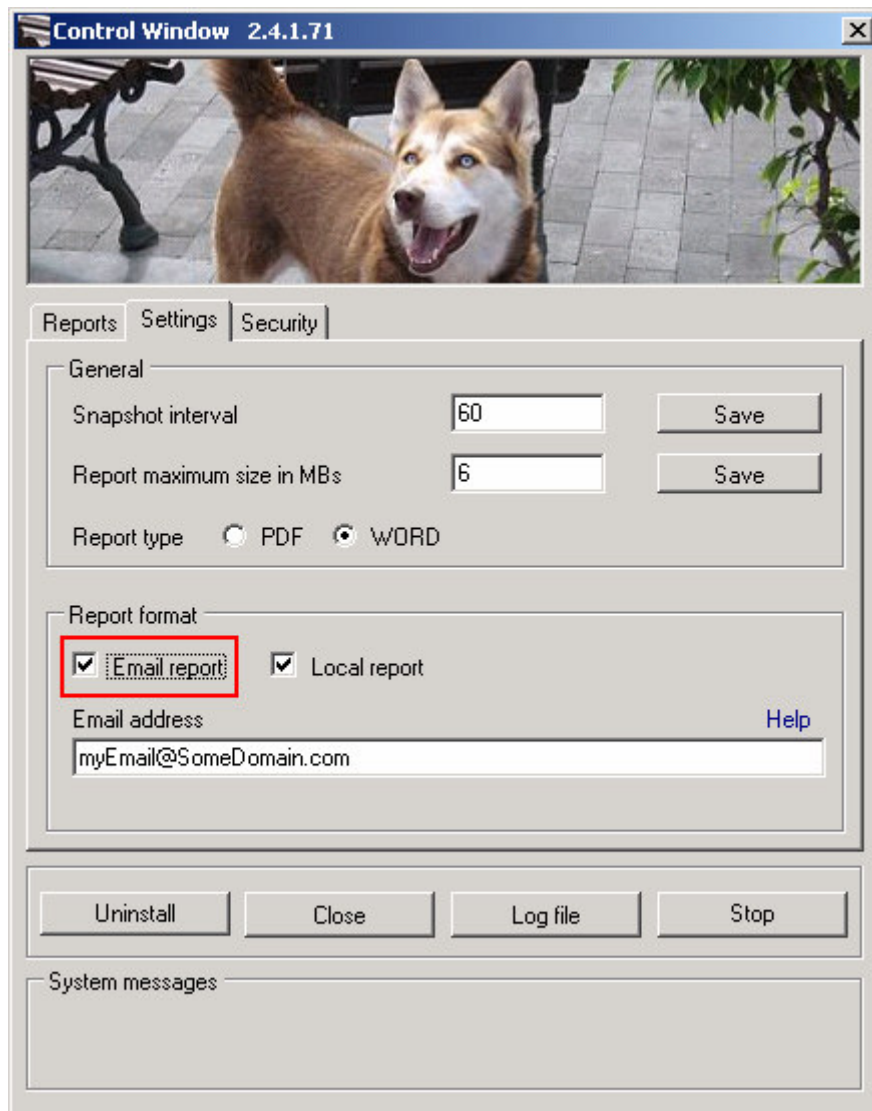

3. Choose the Settings tab

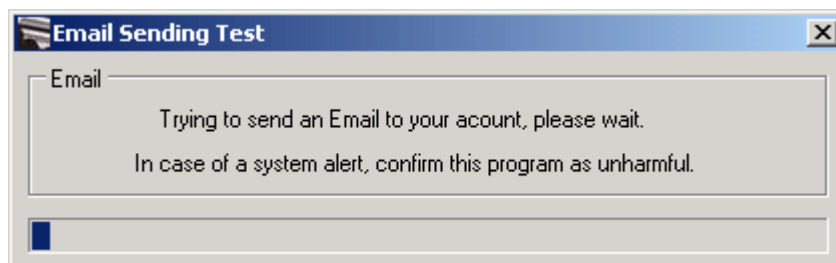

4. Now insert your email address in the "email address" text box

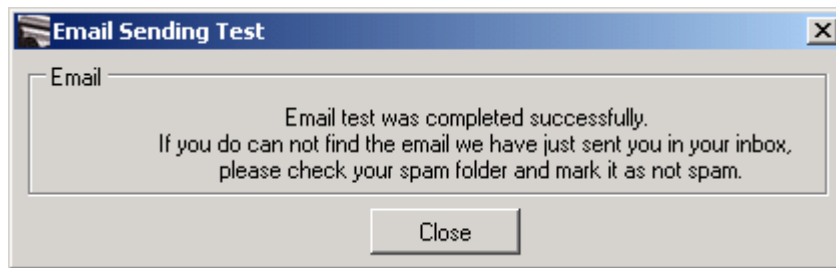

5. Now enable the "Email report" check box

6. In this phase the application is trying to send a test email, some antivirus programs might try and prevent this email from being sent please authorize this procedure in those cases you are required, this will only happen in the test email .

7. Upon successful completion of the test the following message is shown

8. In any time you can cancel the email option from the administrator window by un-checking the "Email Report" check box
9. Please note – for user privacy the email address won't show the next time you popup the administrator window.
